

About HomeScenario

HomeScenario, Inc. offers easy-to-use and affordable smart home/smart office solutions. Integrating technologies of wired/wireless control and broadband networking, the HomeScenario solutions make comfort, convenience, safety, security, and eco-friendliness available without the need of extensive and costly remodeling. The HomeScenario products are designed to work seamlessly with systems such as lighting, thermostats, door access, window shades, security & surveillance, video intercom, audio/video, and more. All of them can be controlled and monitored easily through remote, touch panel, PC, or smart phone and from anywhere via the Internet. The HomeScenario solutions can be well integrated and applied to:

- Home Automation
- Audio/Video Control
- Smart Meeting Room
- Building Automation
- IP Video Intercom
- Green Home/Energy Management

Green Home

- ✦ Automatically controls home systems such as lighting, thermostats, window shades, security & surveillance, audio/video, etc.
- ✦ Fully customized scenarios and user interfaces
- ✦ Viewed and controlled from anywhere via PC, remote, touch screen, or smart phone
- ✦ Minimized wiring efforts, easy to deploy with affordable cost
- ✦ Designed to best fit into interior design style

- ✦ Supports universal IR code database and IR learning
- ✦ RightON technology to ensure correct power on/off via IR control
- ✦ Enables pre-configured scenario control, one click does it all
- ✦ Also controls lighting, window shades, thermostat, etc.
- ✦ Wireless control around the house with no need for line-of-sight
- ✦ Easy to install, no need for extensive remodeling
- ✦ Minimal investments for pure audio/video control, expandable when necessary

- ✦ Smooth integration with meeting room systems including lighting, thermostat, window shades, projector screen, audio/video, etc.
- ✦ Provides easy-to-configure meeting scenarios, such as MEETING, DISCUSSION, PRESENTATION, MOVIE, AWAY
- ✦ Controlled by PC, touch screen, wall panel, portable controller, and more
- ✦ Affordable investments to greatly enhance meeting productivity and corporate image

- ✦ Centralized control of all electric appliances for the whole building
- ✦ Well integrated with video surveillance system
- ✦ Interactive, graphical user interface
- ✦ Can be monitored and controlled anywhere through the Internet
- ✦ Automatic event alert via SMS, e-mail, siren alarm
- ✦ Complete system log, easy to search and manage

- ✦ TCP/IP infrastructure -- reliable and scalable
- ✦ Smooth integration with alarm, access control, surveillance, and home automation systems
- ✦ Secure firewall design to block attacks from the Internet
- ✦ Event alert via SMS, e-mail, and siren alarm
- ✦ Can be monitored and controlled anywhere
- ✦ Modular design -- more services can be added for MDU/MTU

- ✦ Smart power meter to allow real-time monitor of energy consumption for whole-house or single appliance
- ✦ Reports and analyzes long-term power usage pattern
- ✦ Also integrated with a number of wireless sensors and appliance controllers
- ✦ Smart scenarios to optimize power consumption, so as to minimize the electricity bill
